PUC Docket No. 60319

PUBLIC COMMENT OF ADAM STRONG

I own property at [redacted] near proposed Link 1R of El Paso Electric's Pine to McCloud 345 kV transmission line. Proposed Link 1R passes about 8450 feet from my property.

I oppose any route that uses Link 1R.

the area surrounding hueco tanks state park is special for the scenic and historic value, and is host to a well established community. the high voltage lines would adversely affect both the scenic and value and the community that have built their lives around this area. hueco tanks is a premier scenic and historical attraction in an area where these things are few and far between, surely there is a better route further from established communities and scenic and historical attractions. thank you for your consideration, adam strong
