PUC Docket No. 60319

PUBLIC COMMENT OF BRANDON FOX

I am writing about proposed Link 1R of El Paso Electric's Pine to McCloud 345 kV transmission line in El Paso County.

I oppose any route that uses Link 1R.

This would impact many of my friend’s properties in the Hueco Valley anda place I spend months visiting every year. We all enjoy this place for its natural beauty. Given there is an alternative route that impacts fewer residential plots and runs through an area that is not as prized for its peaceful nature and an escape from the city, I would hope the Link 1R does not get approved and instead the alternative route is used. This will also preserve a special landscape for local El Pasoans.
